

ANTISTATIC POLYAMID PA 12, VESTAMID SPECIFICATION

TRADE NAME	VESTAMID L-R2-GF-25
Base	Polyamid PA 12
Filler	25% Glass fiber
Additives	Heat and light stabilizers, decreases of surface resistance, plasticizer
Short mark on ordering sign	PAV
Colour	black
General properties	Permanently antistatic and electrically conductive. Low water absorption, exceptional impact strength, excellent resistance against gases, oils, fuels, hydraulic fluids, various solvent, salt solution and etc., exceptional abrasion resistance, exceptional resistance to stress cracking, noise and vibration damping properties, super fatigue resistance.
Application examples	Housing for explosion - protected measuring equipment or electrical switches, ventilation fans for electric motors loudspeaker boxes, telephone and radio equipment etc.
